PREFACE

Thank you for choosing EnVivo 4GB Aluminum MP3 Player with Clipper, Display and Voice Recording. Please read this user manual carefully before using.

All information on this booklet is subject to change without notice due to technical reasons.
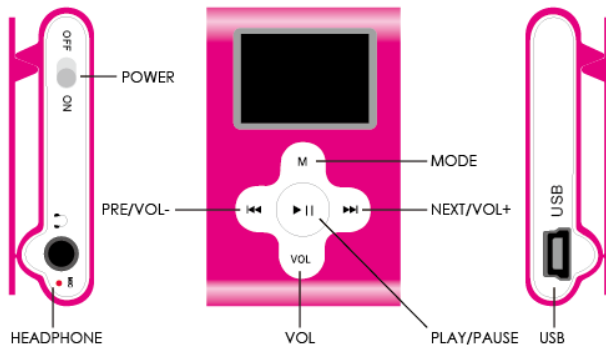

NOTICE

1. You must put the power bottom at "ON" position when you need to charge the player or transfer data..

2. Do not use the player in the extreme hot, cold, dusty or humid environments.

3. Prevent friction with hard objects, or it may lead to surface abrasion, battery fall-off or hardware damage.

4. Avoid the player falling down from a high place, or it may damage the OLED screen or other hardware.

5. Do not wipe the surface of the player with alcohol, benzene or thinners.

6. When the player is left pause state for a period of time, it will automatically power off.

7. Please choose the suitable volume and avoid hurting your ear.

8. Do not disconnect the device when formatting, uploading and downloading data. Doing this can lead to loss of data.

9. In order to avoid mis-operation, we strongly recommend you to manage your files in the player via your computer/laptop.

2. OPERATING INSTRUCTIONS

2.1 Switch ON/Switch OFF

1. Slide the 'POWER' key to ON position to turn on the player and slide the 'POWER' key to OFF position to turn off the player.

2. When the player is on, press and hold the 'PLAY' key 3-5 seconds can turn off the player.

3. When the player is off and the 'POWER' key is at ON position, press and hold the 'PLAY' key can turn on the player.

4. It is recommended to slide the 'POWER' key to OFF position, if the player is not to be used for a while.

Note: The player will turn off automatically when the battery is low.
2.2 Main Menu

After turning on the player, you can use 'NEXT' or 'PRE' button to browse the main menu below:
- Music
- Record
- Sys Set

Press 'MODE' button to enter each mode. Press and hold 'MODE' button to exit and return to the main menu.

2.3 Play Music

1. Turn on the player and plug in the headset. Press 'NEXT' button to choose Music Mode like below and press 'MODE' button to enter Music Mode :

2. Press 'PLAY' button to play music and press it again to pause.

3. In PAUSE status, press 'MODE' button, you can enter the submenu for **file management**. You can delete music files one by one or choose delete all to remove all the files. Please **note** that it is very easy to mis-delete files so please operate your files via PC if possible. You can also choose which song you would like to listen.

Note: "Delete all" will delete all files in the current folder of the current mode. For example, "Delete all" will delete all music files in music mode and will not delete all recorded files.

4. When you are playing the music, press 'NEXT' or 'PRE' to select the next or previous song.

5. Press 'VOL' to enter the volume control interface and use the 'VOL+' or 'VOL-' to adjust the volume. Press 'MODE' button to exit volume control interface after finishing.

6. Choose **PLAY Mode**

When you are playing the music, press 'MODE' button to enter the submenu. Use 'NEXT' or 'PRE' to select Play Mode. Press 'MODE' button again to enter the submenu, then you can choose different play mode:

- **Normal**: play files in normal sequence in each folder
- **Repeat one**: play the current song repeatedly
- **Folder**: play all music files in the current folder and stop when finishing playing
- **Repeat Folder**: play all music files in the current folder repeatedly
- **Repeat All**: play all music files repeatedly
- **Random**: shuffle play different music files in the current folder
- **Intro**: play the first 10 seconds of each music file

7. Choose **EQ** Mode

When you are playing the music, press 'MODE' button to enter the submenu. Use 'NEXT' or 'PRE' to select Equalizer menu. Press 'MODE' button again to enter Equalizer menu. Then you can use 'NEXT' or 'PRE' to choose different equalizer mode (natural, rock, pop, classic, soft, jazz and dbb). Use 'MODE' to confirm your choice after finishing.

8. Replay

When you are playing the music, press 'MODE' button to enter the submenu. Use 'NEXT' or 'PRE' to select 'Replay' menu. Press 'MODE' button to enter Replay menu. You can see the "A" is blinking and press 'NEXT' to define the start point of the replay period. "B" will start to blink and press 'NEXT' to define the end point of the replay period. Press 'MODE' button again to enter the submenu and find the 'Replay time'menu to set up the replay times from 1 to 10.

9. Dir navigation

When you are playing the music, press 'MODE' button to enter the submenu. Use 'NEXT' or 'PRE' to select 'Dir navigation' menu. Press 'MODE' button again to enter the Dir navigation menu. Then you can locate the music you would like to listen by using 'NEXT' or 'PRE' button. Use 'MODE' to confirm your choice after finishing.

10. Lyric display

This player support '*.LRC' files and the lyrics can be displayed simultaneously when playing the music. Just save the lyric file as the same name as the related music file:
e.g. Music file name: My love-west life.mp3 and Lyric file name: My love-west life.lrc

When the lyric file name matches with the song, the lyric icon will be displayed. Press and hold 'MODE' button to enter the Lyric Interface when playing the music. The lyric will be displayed.

Press 'MODE' button again shortly to exit lyric display.

2.4 Record Mode

1. After turning on the player, make sure the battery is not low. Use 'NEXT' button to choose Record Mode like below and press 'MODE' button to enter Record Mode:

2. Press 'PLAY' button to start recording and press 'PLAY' button again to pause. Press and hold 'MODE' button to save and exit. The recorded file will be saved in the folder named 'RECORD'. You can play your recorded files under 'Music Mode'.

   Note: User can select any directory as current record directory. The recorded file will be saved at the directory you choose. When you listen to it in the Music Mode, please find the file at that directory as well.

3. If 'Overflow' is displayed on the screen, it means the memory of the player is full. Please delete some files to make some space available.

4. This player supports four recording types (Please choose higher bit rate for better sound quality):.

   - **32K BPS**
   - **64K BPS**
   - **192K BPS**
   - **384K BPS**

5. Choose recording type:
   - In the Record Mode, press 'MODE' button to enter the submenu
   - Press 'NEXT' button and select REC type. Press 'MODE' to enter
   - Use 'NEXT' button to select the recording type and press 'MODE' to confirm the choice
   - Press 'PLAY' to start recording

6. Press and hold 'MODE' to exit.

2.5 System Setting

1. When the player is on, use 'NEXT' button to select System Setting Mode like below:

2. Press 'MODE' button to enter the submenu of System Setting

3. Submenu
   - Record Time – mark the date and time when recording; it will be reset after power off
   - Backlight – set up the time of backlight on
   - Language – set up the operation language
   - Power off – set up the time of the player turning off automatically
   - Contrast – set up the contrast level of the screen

- Memory Info – show memory capacity and the percentage of used space

- Firmware Version – display the firmware version

- Firmware upgrade – for firmware update or reset your player (not recommended)

- Exit – exit from the submenu

4. How to set up:

- Use 'MODE' button to enter each submenu/confirm the choice

- Use 'PRE'/'NEXT' to adjust or select different options

- Choose Exit or press and hold 'MODE' button to quit the submenu

- Use 'VOL' button to set up Record Time and press 'PRE'/'NEXT' to adjust the number

- Please contact our hotline support for firmware upgrade

2.6 USB Connection

1. Connect the player with the computer/laptop via the USB extension cable

Note: Please turn on your player when connecting it with your computer/laptop.

2. There will be a **Removable Disk** appear when you double click "**My Computer**" on the Desktop.

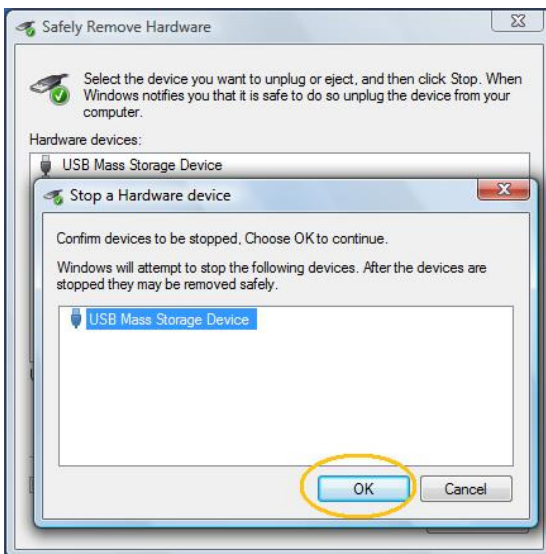

3. Drag and drop files into the Removable Disk.

4. Double click on "**Removable Disk**" then you can open it.

5. You can also create folders in the Removable Disk.

6. Please **DO NOT** disconnect or turn off the player when you are downloading or uploading files.

7. Please use '**safe removal**' after finishing the file operation. For **Windows OS**, you should double click on the "**Safely Remove Hardware**" icon like below:
8. Then the below window will pop up and please select your device:

9. Click "**Stop**" button and select your device again. Then click "OK" button to confirm like below:

10. Wait for a few seconds and you will see a window pop up like below:

11. Now you can safely disconnect your player from your computer/laptop.

12. For **Mac OS**, please close all programs, files and windows stored or running on the player. Drag the icon of your player into "Trash" like below and then you can un-plug your player from your computer/laptop:

2.7 Charging

1. ▭ indicates battery low and the player needs to be charged.
